

Attorney's Docket No. DYOU13.1A2CP1

DECLARATION - USA PATENT APPLICATION

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name;

I believe I am an original, first and joint inventor of the subject matter which is claimed and for which a patent is sought on the invention entitled NUCLEOTIDE SEQUENCES AND PROTEIN SEQUENCES; the specification of which was filed on January 21, 2002 as Application Serial No. 10/054,399.

I hereby state that I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above;

I acknowledge the duty to disclose information which is material to patentability as defined in Title 37, Code of Federal Regulations, § 1.56;

I hereby claim the benefit under Title 35, United States Codes § 119(e) of any United States provisional application listed below.

Application No.: 60/169,699

Filing Date: December 7, 1999

I hereby claim foreign priority benefits under Title 35, United States Code, § 119(a)-(d) of any foreign applications for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed:

PRIOR FOREIGN APPLICATIONS

**Priority
Claimed**

No.: GB9721358.1	Country: Great Britain	Date Filed: October 8, 1997	Yes
No.: GB9721357.3	Country: Great Britain	Date Filed: October 8, 1997	Yes
No.: GB9812793.9	Country: Great Britain	Date Filed: June 12, 1998	Yes

I hereby claim the benefit under Title 35, United States Code, § 120 of any United States application(s) listed below, and insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code § 112, I acknowledge the duty to disclose information which is material to patentability as defined in Title 37, Code of Federal Regulations, § 1.56, which became available between the filing date of the prior application and the national or PCT international filing date of this application:

Prior U.S.A. Applications

Application No.: 08/951,141	Filing Date: October 15, 1997	Status: Pending
Application No.: 09/732,180	Filing Date: December 7, 2000	Status: Abandoned

NUCLEOTIDE SEQUENCES AND PROTEIN SEQUENCES

Related Applications

5 This application is a continuation-in-part of U.S. Application No. 09/168,474 filed October 8, 1998, which claims the benefit of priority under 35 U.S.C. §119(e) of U.S. Application No. 08/951,141, which was filed as a nonprovisional application on October 15, 1997 and converted to a provisional application by petition mailed by Applicants on October 8, 1998, and also claims the benefit of priority under 35 U.S.C. §119(a) to applications GB9721358.1 filed October 8, 1997, GB9721357.3 filed 10 October 8, 1997, and GB9812793.9 filed June 12, 1998. This application is also a continuation-in-part of U.S. Application No. 09/732,180 filed December 7, 2000, which claims the benefit of priority to U.S. Provisional Application No. 60/169,699 filed December 7, 1999. The complete disclosures of the above-referenced related 15 applications are herein incorporated by reference.

Field of the Invention

The present invention relates to nucleotide sequences and protein sequences. In particular, the present invention relates to nucleotide sequences and protein sequences 20 that affect interactions of cellular components.

Background to the Invention

According to Cerione and Zheng (The Dbl family of oncogenes *Current Opinion In Cell Biology* 8, 216-222 (1996)), genetic screening and biochemical studies during the past 25 years have led to the discovery of a certain family of cell growth regulatory proteins and oncogene products for which the Dbl oncoprotein is the prototype. Another review on Dbl is presented by Machesky and Hall (1996 Trends In Cell Biology 6 pp 3-4-310).

Cerione and Zheng (*ibid*) say that proto-Dbl is a 115 kDa cytoskeleton-associated 30 protein that is found in tissues such as brain, ovary, testis and adrenal glands. Oncogenic activation of proto-Dbl occurs as a result of an amino-terminal truncation of proto-Dbl which leaves residues 498-925 fused with the product of an as yet unidentified gene which is localised on chromosome 3.
